PASS

There were 73 questions on the final exam. The highest score was 73, (100%).
The lowest score was 57, (78.08%).
The mean was 66.83, (91.55%).

Student scored 57/73 on his Neurology Final Exam. This was not a passing score. He returned after a period of study to retake another version of the exam test and he did pass it.

J. Wojcieszek, MD

The student's Combined Clinical Average Scores of Staff and Residents was 5.88 out of a maximum possible of 9.

CLINICAL PERFORMANCE EVALUATIONS:

> This student can be a little quiet, and should take more initiative in seeing patient's but overall he did a good job.
> *Matthey Meyer, M.D. (Neurology Resident)*

> This student is an amiable young man and completed the requirements of this rotation adequately. In terms of constructive feedback I would recommend that he work at becoming more engaged during rounds and teaching/lectures.
> *Loretta VanEvery, M.D. (Neurology Faculty)*

> This student while very pleasant showed little initiative during this rotation. He was frequently late. He rarely participated in informal educational lectures, and often spent his time on the internet. He did do what was asked of him, but little else on his own.
> *Jodie Engle, M.D. (Neurology Resident)*

> Needs to work on history taking.
> *Jessica Green, M.D. (Neurology Resident)*

PATIENT COMMENTS REGARDING STUDENT'S COMMUNICATION SKILLS:

STUDENT STRENGTHS: Doesn't interrupt. The student was very patient with my child. He was very professional and knowledgeable.

ADVICE TO IMPROVE HIS/HER COMMUNICATION SKILLS: None, he did good. Sometimes asked questions too fast. Needs to listen to patient more, will be a good doctor if he doesn't get in a hurry.
